Irritrol's Rain Master[®] Controllers: Recognized for Industry Leading Innovation and Water Efficiency

Simi Valley, Calif., November 2008: Irritrol's line of Rain Master[®] central control products just got stronger with the introduction of the new Eagle^{Plus}[™], which will be unveiled at the Irrigation Show in Anaheim, CA, on November 2. Within the industry, Rain Master controllers are known for their user-friendly interface, superior functionality and optimal energy and water saving features.

The NEW Eagle^{Plus} retains all the unique features and benefits of the standard Eagle controller, including *iCentral*[™] Internet control programming capabilities. Its comprehensive list of new *Pluses* provides even greater functionality to equip the user with the tools necessary to maximize irrigation efficiency and water savings.

The Eagle^{Plus} has been designed to utilize one of the fastest micro-processors available in order to enhance “real time” irrigation control, and offers the following additional features:

More Connectivity

- Wireless cellular communications
- Faster “real time” Internet access to *iCentral*[™]
- Expanded text message Smart Alerts[™]

More Configurations

- Up to 48 stations standard configuration
- Up to 16 programs (8 for standard and 16 for two-wire)
- Two-wire capability - up to 200 stations

Enhanced User Interface

- Multi-line LCD backlit display
- Simple multi-function input knob
- Multi-language capabilities
- Intuitive operation
- Transient protection standard – all models
- More system diagnostic tools

Historical Data Retention:

- ET (previous 14 days of ET values)
- Smart Alerts[™] / alarms (100)
- Irrigation cycles (Last 25 executed programs)

For over 25 years, Rain Master, based in Simi Valley, CA, has been the recognized innovative leader in the design and manufacture of irrigation controllers, handheld remote controls and central computerized control systems for the landscape irrigation markets. Creator of *iCentral*[™], the industry's first web-based central control system, Rain Master sets the standard for water efficient and cost effective irrigation controls and water management systems. Rain Master consistently offers new and innovative technologies that exceed irrigation industry quality and performance standards for "SMART" ET- weather based irrigation controls.
